### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over So et al., 6,414,904.

So et al., 6,414,904, discloses in Fig. 1 a memory system comprising:

memory controller 11;

a plurality of system data buses DB1 to DB8 each having a width (see lines 48-53, column 3) and being wired in the form of a straight line (see lines 65-66, column 5);

a plurality of memory modules 12a to 12d;

common control and address bus CAB being wired to alternately reciprocate from side to side (see lines 66-67, column 5 and lines 1-5, column 6).

What is not shown in So et al., 6,414,904, is the chip selects signals as recited in claims 1, 8, 15 and 18-19. However, one of ordinary skill in the art would have obvious known that the chip select signals are included in the common control and address bus CAB.

What is not shown in So et al., 6,414,904, is the data transmission times as recited in claims 3, 10 and 17. However, one of ordinary skill in the art would have

Art Unit: 2827

obvious known how to wire a plurality of system data buses DB1 to DB8 such that data transmission times to be the same from the memory modules to the memory controller.

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Robertson et al., 6,658,530, Halbert et al., 6,747,887, and Kyung, 6,438,015.
